From the first step at entrance, the wide view and harmony scene brings a WOW effect. Spacious, simplicity and interactive are the main design elements for this apartment. The open kitchen, living area and dining area are functioning independently yet connective, in addition to the study room with clear glass partition, these areas are individual yet somehow combined altogether. The couples, no matter are cooking, working or relaxing, are closely interacted.

Walls are mainly of white paint, matching with grey sofa, wooden plank, blue feature wall, this colour combination together with the application of general and decorative lighting, create a relaxing and comfortable tone in a good harmony.
