The family invites us to design a different private space for them, according to their favorites; we use lots of colors to create a unique and comfortable living space. Green is the favorite colour of the lady clients while the

man love orange. Orange and green make a contrast to separate study room and bedroom.

And a rainbow was also featured in this space: it goes through the hidden room door, makes it more invisible;

it also runs through the living room and dining room, from ceiling to every wall, makes the whole residence more vivid.
